

Focused on essentials

DRÄGER
SAVINA® 300
CLASSIC

How can a ventilator help to make your daily work easier?

The best possible patient care is your focus every day. That's why you need a ventilator you can rely on, in any situation. It is essential to have a reliable device that is versatile and easy to use. Especially in acute care medicine you have to work under immense time pressure. The intuitive use of the Savina 300 Classic (in the configuration) helps you work more efficiently and have more time for your patients.

RELIABILITY MEETS FLEXIBILITY

Around the globe, Savina ventilators have provided more than 1.4 billion hours of quality ventilation. The Savina 300 Classic comes with an integrated safety concept that makes it a reliable partner. It is designed to meet the ventilation needs of even the most critically-ill patients, yet it is flexible enough to be used nearly anywhere in your hospital.

VENTILATION THAT'S GENTLE AND PROTECTIVE, YET POWERFUL AND EFFECTIVE

Your team will be using the Savina 300 Classic with confidence in just a short time. The large color touch screen and intuitive operating system that focuses on essential features makes configuration and operation very simple.

In addition to the renowned ventilation quality of Dräger devices, the ventilation system compresses ambient air for the breathing gas allowing the device to operate independently of the central gas supply.

The functionality you need in one device.

EASE-OF-USE

- Intuitive for simple operation and quick configuration
- Dräger-wide standardised user interface provides confidence in use and reduces training time
- Quick operational readiness with an automatic device check
- Intelligent alarm handling for a quick response to patient alarm situations
- Smooth and sealed surfaces for easy cleaning and disinfection

HIGH VENTILATION PERFORMANCE

- Wide range of ventilation modes
- Stress-free spontaneous breathing with excellent trigger response time thanks to the turbine
- Free breathing with AutoFlow® in volume constant ventilation at a minimum pressure level
- Non-invasive ventilation (NIV) with a very quick response time to patient efforts – available in all modes
- Extended graphic capabilities with loops, trends and logbook
- No device change in case of altered ventilation therapy necessary: O₂-therapy allows oxygen application with constant flow

INDEPENDENT FROM GAS AND POWER SUPPLY

- Built-in-turbine with rapid response time and continuous high flow delivery of up to 250 l/min
- Up to five hours of independent ventilation due to built-in and external batteries
- Transport Supply Unit (TSU) can be quickly attached for ergonomic handling of gas cylinders
- Bed coupling for quick connection between ventilator and patient bed
- Low Pressure Oxygen (LPO) inlet for ventilation without central gas supply

Caution! Consult accompanying documentation

max. 5'

Operate with confidence in every phase.

A dependable companion along the respiration pathway: The Savina® 300 Classic is suitable for invasive and non-invasive therapy in a single device, in acute and chronic care patients. The different ventilation modes and the O₂-therapy work when the device is stationary and on the move.

PREVENT

- Comprehensive NIV in all ventilation modes to prevent or delay intubation and reduce the risks associated with intubation^{1, 2}
- Sensitive and accurate triggering reduces the work of breathing

STABILIZE

- AutoFlow® automatically adjusts the pressure level to the patient's changing lung mechanics in volume constant ventilation
- Lung protecting assisted ventilation with PC-AC avoids harmful pressures
- Integrated Capnography for continuous monitoring of CO₂ gas exchange

WEAN

- PC-BIPAP/PC-SIMV+³ supports continuous weaning by allowing a smooth transition between mechanical ventilation and natural respiration
- The open breathing system with AutoFlow® allows spontaneous breathing in all ventilation modes
- Sensitive triggering and rapid response to the patient's high flow demand support pressure controlled ventilation

RECOVER

- NIV can reduce re-intubation and infection rates and shorten ICU stays⁴
- Sensitive triggering helps to improve patient-ventilator synchrony
- Spontaneous breathing thanks to CPAP/PS
- O₂-therapy supports recovery after extubation and non-invasive ventilation

Accessories

MT-0575-2007

NIV FULL-FACE MASK CLASSICSTAR®

Dräger offers a wide variety of dedicated accessories for the Savina 300 Classic. The ClassicStar NIV full-face mask is designed for non-invasive ventilation therapy. With its air-filled cushion, the mask can be adjusted individually to the patient's face and so provides effective therapy.

Transport

D-43492-2012

TRANSPORT SUPPLY UNIT, BED COUPLING, SET DC BATTERY

Flexible enough to be used nearly anywhere in your hospital with up to five hours of independent ventilation due to built-in battery and external power supply, a Transport Supply Unit for two gas cylinders and a bed coupling for quick connection between ventilator and patient bed during transport.

Training

SAVINA 300 VENTILATOR TRAINING VIDEO

This film shows you how easy it is to operate the Savina 300 ventilators. It demonstrates the most important features, using the example of Savina 300 Select. It shows how to initialise the unit, how to operate it as well as how to clean and maintain it.

Service

DRÄGERSERVICE – BECAUSE QUALITY COUNTS

For any requirement you have, we have the service contract that fits: from inspection-only and preventive maintenance to complete service packages. We have the answer for your individual needs. Regardless of the service package Savina 300 Classic comes with a manufacturer warranty of 8 years for the turbine*.

* Limited Manufacturer Guarantee subject to conditions specified in the Instructions for Use. Applies only to devices purchased after 1/1/2015.
